25X1

1. Work is continuing on the construction of an airfield at Tchorovice (N 50/L 41). The eastern end of the runway is practically completed, while the western end is still being prepared. It will be a runway planted in grass. At the western end, the work was delayed because it was necessary to level the terrain and move considerable earth.

2. The runway will be 2,150 meters long and 250 meters wide; it will run east and west. Its altitude is 460 meters above sea level and the geographic coordinates are 49° 26' N. and 13° 48' E. The runway could not be extended at either end without considerable work.

3. The runway has a relatively strong grade, rising continually throughout its length from east to west.
